PROFESSIONAL SUMMARY

Full Stack and Applied AI intern at VittalWeb, building production AI agents and LLM features for client workflows. Recent work includes a WhatsApp scheduling agent, a platform with four specialized agents, and automated conversation evaluations. I also built a document assistant with source-grounded RAG. I am seeking an AI Engineer role focused on applied LLM systems, agent orchestration and reliable integrations.

TECHNICAL SKILLS

AI systems: LLM agents, OpenAI tool calling, LangGraph, Agent Development Kit (ADK), RAG, prompt design, LLM-as-judge and end-to-end evaluation, guardrails.

Backend and integrations: TypeScript, Bun, Node.js, Python, FastAPI, Hono, REST APIs, RabbitMQ, webhooks, Zod.

Applications and data: React, Next.js, PostgreSQL, Prisma, Drizzle, ChromaDB, SQL.

Delivery and testing: Docker, Docker Compose, GitHub Actions, CI/CD, Dokploy, Jest, Git, Oracle Cloud Infrastructure.

PROFESSIONAL EXPERIENCE

VittalWeb, Full Stack and Applied AI Intern (Jun 2026 - Present)

- Led development of a production WhatsApp scheduling agent for availability checks, bookings, rescheduling, cancellations and handoff to staff.
- Added deterministic LLM safeguards, versioned prompts and flag-controlled RAG; tested changes with 30 end-to-end conversation flows and LLM-as-judge evaluations, with no regression in the evaluation results.
- Refactored the main message handler from 1,532 to 378 lines and added characterization tests.
- Designed a WhatsApp platform with four specialized agents in production, connecting ERP and CRM systems through OpenAI tool calling and RabbitMQ; set up GitHub Actions and Dokploy deployment workflows.
- Built an internal data hub and AI agent with scoped access controls and LangGraph-based planning and evaluations.

WiseUp Online, Sales Executive (Aug 2021 - Nov 2025)

- Built strong customer communication and mentoring skills through consultative remote sales, colleague support and training.

SELECTED AI AND SOFTWARE PROJECTS

Axiom Tech: Document assistant with RAG. GitHub: github.com/andrecodexvictor/Axiom-Tech

- Built a document question-answering application with Python, FastAPI, React, LangGraph and ChromaDB; responses cite sources and state when evidence is insufficient.
- Implemented multi-format document ingestion and deployed the application on OCI with Docker Compose and GitHub Actions.

Script Kitty: AI security automation. GitHub: github.com/andrecodexvictor/Script-kitty

- Built an open-source defensive security tool with a TypeScript CLI and MCP server, Python analysis modules, AI guardrail checks, scoped permissions, human approval and audit logging.

ZenPR: Developer tooling. GitHub: github.com/andrecodexvictor/ZenPR

- Built a Next.js/TypeScript pull request review workbench and MCP server with repository-specific feedback rules.

EDUCATION AND CERTIFICATION

Bachelor of Information Systems, Federal Institute of Bahia (IFBA), Vitória da Conquista (expected 2026)

Oracle Cloud Infrastructure AI Foundations Associate, Oracle (Sep 2026)

LEADERSHIP AND LANGUAGES

Portuguese (native), English (C1), Spanish (intermediate). Student council member at IFBA and university speaker on communication and personal branding.
